

## Trader Behavior Insights Report

### 1. Introduction

This report provides a simple overview of trader behavior using basic analysis steps.

It includes data loading, structure checking, and preparation for further analysis.

### 2. Data Loading

In this step, the dataset is loaded using Python's pandas library.

This helps in accessing the data and preparing it for analysis.

### 3. Basic Data Overview

We examine the first few rows, shape, and structure of the dataset to understand its contents and identify any missing values or inconsistencies.

### 4. Conclusion

The initial steps performed here prepare the dataset for deeper analysis such as visualization, feature exploration, and modeling in future stages.
